Dave,

FYI - no action necessary at the moment. IOAA just wanted us to be ready in case input was needed. I had talked with Rick Wilkin (geochem), Steve Acree (hydrogeol), and Jim Weaver (subsurf modeling) on Friday PM. All 3 said they would provide assistance if needed. But like I said, nothing has come up yet.

Talk to you tomorrow.

Bob,

I was out of the office on Friday, so I am just now seeing your message.

If ORD or any of the EPA Regions need any technical assistance related to the Gold King Mine contamination, please contact me and we will get a team of experts together to address the issues.

Thanks.

Dave Burden

Subject: GW well tech assistance

Tom

If you need tech assistance on well infiltration, the main contact is Dave Burden in our Ada Lab. Number 580-436-8606. He heads the tech support center. The Branch Chief there is Dave Jewett, phone 580-436-8560. Cc'ing them both on this. Joe Williams, the SSWR MI for NRMRL, provided the names. Also cc'ing the lab director there, Richard Lowrance.
